Last Updated: August 2026

Security Summary: AETERA operates a secure-by-default infrastructure prioritizing creator safety, strict data privacy, and legal compliance. As an international remote studio, AETERA strictly adheres to GDPR data handling requirements, utilizes secure B2B financial gateways for payouts, and enforces enterprise-grade identity protection protocols for all active live streamers.

Corporate Zero-Exposure Mandate (Identity Protection)
To ensure absolute physical and digital safety, AETERA strictly prohibits the public publication, directory listing, or unapproved social tagging of its active creators, technical operators, and internal team members. The anonymity of AETERA's global talent pool is a structural security feature designed to prevent digital stalking, harassment, and unauthorized solicitation. Personal and professional identities are kept completely separate.

CREATOR SAFETY & BROADCASTING PRIVACY

AETERA deploys comprehensive tools to protect the psychological and digital well-being of female creators:

- **Stage Name Execution:** All broadcast work is performed under approved stage names to maintain complete separation between the creator's real life and online persona.
- **Advanced Geo-Blocking:** Strategic privacy settings and geo-blocking protocols are deployed to restrict broadcast visibility in the creator's local region, reducing the risk of unwanted local exposure.
- **Operator Moderation Shield:** The 1:1 dedicated technical operator actively filters haters, trolls, and rule-breaking chat activity in real time, serving as a psychological shield for the creator during live shifts.

DATA HANDLING & PRIVACY (GDPR)

AETERA handles applicant and creator data in strict accordance with international privacy regulations (GDPR):

- **Minimal Initial Data Collection:** The initial application form (via Tally) collects only a first name, age, social link, and email. No sensitive or secure documents are required at the initial stage to preserve maximum privacy.
- **Secure Age Verification:** Age is verified securely using identity documents. Only the date of birth and photograph must be visible; unnecessary sensitive information on the document may be physically or digitally covered by the applicant.
- **Data Deletion Protocol:** If a live streamer stops working with AETERA, the accounts and promotional materials created by the agency are removed immediately without bureaucratic delays.

TRUST — SECURITY & COMPLIANCE (CONTINUED)

BROADCAST & LEGAL COMPLIANCE

AETERA maintains strict operational boundaries regarding content and legal compliance across its international network:

- **Strict Non-Adult Standard:** AETERA operates exclusively in professional non-adult lifestyle live streaming. The agency absolutely forbids the use of adult content.
- **Prohibited Activities:** AETERA strictly prohibits the promotion of smoking, alcoholism, illegal drugs, or any unlawful activities during broadcasts.
- **Local Law Adherence:** Work is organized strictly within the laws of the female creator's country of residence. If certain topics or actions are prohibited in her specific jurisdiction, AETERA automatically excludes them from her broadcast strategy.
- **Platform Guidelines:** All broadcast activities are managed to comply rigorously with the specific Terms of Service (ToS) of partner platforms (Twitch, YouTube, Kick, TikTok, etc.).

PAYMENT & FINANCIAL SECURITY

AETERA utilizes highly regulated, international B2B financial gateways to process weekly earnings securely without retaining creator funds unnecessarily:

- **Global Bank Transfers:** Executed via secure, encrypted SWIFT/SEPA channels.
- **PayPal Settlement:** Fast digital distribution compliant with global anti-money laundering (AML) standards.
- **Blockchain Gateways (USDT):** Secure stablecoin transfers providing financial accessibility and protection for creators operating in regions with unstable traditional banking infrastructure.

INCIDENT RESPONSE & TRUST COMMITMENTS

AETERA provides a comprehensive support safety net encompassing technical, producer, and emotional support. While the agency actively works to build highly successful creators, AETERA maintains ethical transparency by publicly stating that it does not promise guaranteed identical results or "easy money" for every applicant. Live streaming is treated as serious, secure, and professional remote work.

For privacy inquiries or compliance reporting, parties may contact the internal operations team via **hello@aetera.co**.
